

THE MINES OF UTAH.

The mining interests of Utah are now reaching a stage of development that assures their worth and reliability. At Stockton one small furnace is now at work turning out **one** **one** **one** silver bricks, while one or two others, on a more extended scale, are approaching completion.

Dr. Congar, who came in from the Cottonwood mines yesterday, informs us that his furnaces at that place are turning out metal in large quantities, and within six days he will be at work turning out pure silver bricks.

Parties are also engaged in erecting furnaces at the Bingham Canion Mine, with every prospect of success, while from Pahranagat, which is now supposed to be a part of Nevada, although the mines are being worked mostly by parties from this city, we receive the most encouraging reports. We have seen one five pound silver brick which was turned out by one of the furnaces lately constructed in that section.

These facts are not escaping the notice of Eastern capitalists, and their representatives as well as men of scientific merit are arriving in our city almost daily, and we believe that the capital they are bringing to Utah will give business in this Territory an impetus which is altogether unprecedented.

From California.

(From the Enterprise.)
San Francisco, Sept. 12.
The Pacific Mail steamer Colorado, which left Panama on the night of Aug. 29th, where she connected with the steamer leaving Aug. 21st, arrived here at 2 p. m. yesterday.

By the way of Panama, we have Valparaiso dates of Aug. 3d, and Callao dates of Aug. 14.

The Cuban man-of-war Henrique had arrived at Valparaiso from England. He experienced much bad weather during the voyage which caused considerable detention.

The debates in the Spanish Courts, in relation to the bombardment of Callao, has caused no little amusement throughout Chile.

Admiral Tucker has at length got command of the Peruvian fleet. Senor Montrouz' conduct in this matter has given general dissatisfaction.

THE FAIR.

The thirteenth annual exhibition of the California State Agricultural Society was well inaugurated yesterday. By night the articles for exhibition (with a few exceptions, for some entries having been made to-day were in place. The visitors, both at the Stock Grounds and Hall, compared in number with the average of former years. The leading attractions at the latter appear to be wool, grapes, silk and cotton—two of them leading staples of the State, and the others may soon be. Vegetables, grains, fruits, &c., perishable in their nature and that cannot be manufactured, or are not manufactured into non-perishable material, do not draw now. When there was doubt concerning California's ability to produce certain cereals and fruits cheaply, the size and quality of the apple, peach and potato demanded investigation, but now that all these articles are in vast abundance everywhere within our borders, the public pass them by without a thought. The four articles named are growing into magnitude—the grape crop and wool crop will in time equal if not surpass the yield of gold, and the silk and cotton, but more particularly the silk, will next year and thereafter, receive much consideration in this section. Wool and silk and wine are somewhat like gold, in this, that the market cannot be overdone. The demand for them is, and always will be in our day greater than the supply, and the same may be said of cotton (although it is doubtful whether this State can ever compete with the South in the production of that staple) but not so with wheat, apples, potatoes or turnips. The fruits are wonderful in size and cumulative in variety. The female handiwork very fine; the mechanism and new inventions therein not equal to the past, but still worthy of exhibition and investigation, and the quadrupeds, though not so vast in number, is perhaps superior in kind to those that have gone before. —See Bee.

Protection needed for Miners and Others.

Telegrams from Leavenworth up to Aug. 29th, continue to be laden with accounts of Indian outrages on the Plains. On Salt Creek seven Government surveyors have been killed by the savages. Quite recently they attacked and stampeded a Mormon train at Wagon Hound, and attacked and burned Dyer Creek Station, 100 miles west of Fort Laramie. They had also commenced a massacre of the inhabitants between Forts Garland and Union in New Mexico. Some of the tribes have torn to pieces the "territory" recently signed by their Chiefs. These outrages and others mentioned in a former issue of the *Journal of Mining*, all show plainly enough that the temporizing policy of our Government, will not answer any longer. Our miners of the Far West need protection, and they must have it, even though in giving it to them the extermination of every tribe of uncivilized Indians is the consequence. —*American Journal of Mining*.

THE Smithsonian Institute at Washington, which was destroyed by fire, is in process of being rebuilt. It is intended the whole edifice, when completed, shall be fire proof.

Two English gentlemen, Capt. Baltin and Mr. George Snell, have invented a system of stereography which will abbreviate even Electric Telegraphy. It has met with the approval of Cyrus W. Field, and will enable the company not only to meet the demands upon them, but reduce the tariff of prices. The new system, if successful, will almost revolutionize telegraphy.

Queen Emma.

Queen Emma sailed from New York September 1st as the guest of the Pacific Mail Steamship Company, and will probably arrive here about the 15th. Apartments have been engaged for her by the Hawaiian Consul at the Oriental Hotel. She left Honolulu some fifteen months ago, on board a British vessel, which conveyed her to Panama. At Aspinwall another English Government vessel was placed at her disposal by which she was conveyed to England. Her sojourn there was a continued ovation. She was entertained by the Queen and extensively feted by the nobility. Crossing over to France, she was cordially received by Napoleon, and remained his guest for some time at Compiègne. She also visited Italy, where she received marked attention. Arriving in New York, she was overwhelmed with official and social courtesies, and visited Washington, where she became the guest of Secretary Seward, and was the recipient of various attentions at the hands of the President and heads of departments.

Queen Emma is about 35 years old, and is, as our reader generally knows, the widow of King William. She is rather prepossessing in appearance, well-educated and self-possessed. She is popular with her people, and has done considerable toward elevating their condition.

We should add that her return home is hastened by the news of the death of her adopted mother. A few years ago she lost her husband; shortly after she was called to mourn the loss of her only son—a very interesting child; and now her return to her native shores is demanded by the desire of another near and dear relative.—*F. Bulletin*.

Nevada Items.

Colonel W. H. Howard, one of the pioneers of California and Nevada, died in Virginia City on the 12th. Arthur Reggio, a miner, was killed in the Gould & Curry Mine on the 14th. A party of brutes in Virginia City induced a little boy only seven years of age to drink beer to such an extent that he died on the 15th.

MONTANA SCENERY.—The *Montana Post* says the scenery of the Yosemite Valley, as described by Bowles in his new book, "Across the Continent," though very grand and peculiar, is not more remarkable than the scenery at the passage of the Yellowstone through the Snowy Range, one hundred miles northeast of Virginia City. The rocks on either side, for a great distance, are equal in height to those of the Yosemite, and the river steals through the gorges with the swiftness and stillness of an immense serpent, leaping into joyous rapids at the point of its release. We should like to have Bierstadt visit this portion of our Territory. He could make a picture from this piece of scenery surpassing either of his other views of the Rocky Mountains.

THE MARCH OF PROGRESS.—The following we clip from an exchange:

The Viceroy of Egypt has determined to abolish Polygamy in his family. Henceforth the Viceroy will have only one wife, and may only divorce her at the point of her death. We will find the Day of Judgment will be spent in the same manner.

MILITARY AFFAIRS ON THE WESTERN FRONTIER.—Brevet Major General P. St. G. Cooke, commanding the Department of the Platte, recently issued an order announcing that he had assumed command pursuant to an order from the Military Division of the Missouri. The organization and command known as the "District of the Platte" will be discontinued the 9th of September. The order also assigns the Indian scouts to be employed as cow boys and to watch the movements of hostile Indians along mail and emigrant routes to the various posts of the department.—*Washington Chronicle*.

THE VICE-ROY OF EGYPT.—The following we clip from an exchange:

The Viceroy of Egypt has determined to make away, in Utah as in Egypt, and they that clog the wheels of human progress had better clear the track or soon they will be crushed to powder!

ACCIDENT.—We learn that General McDowell, accompanied by his wife and daughter, Major Kirkham and Professor Blake, being on their way to Camp Independence, and winding their way over the rugged Sierras, the stage upset, turning completely over, and leaving the wheels spinning in the air; and notwithstanding the coach was badly smashed not one of the party was even slightly injured.—See Bee.

"Why don't your father take a newspaper?" said a man to a little boy, whom he caught pilfering his paper from the door step. "Coz he sends me to take it," answered the impudent urchin. That is what the matter with many of our non-subscribing readers.

NEW DESULPHURIZER.—We understand that Lyon & Co. are putting up one of the patent Swanson desulphurizing furnaces of which Prof. Hill spoke, when here last. He said a furnace would desulphurize 40 to 50 tons a day, when here last. He said a furnace with no fuel except the sulphur in the ore, of which there must be 18 per cent. This is far below the percentage in the most of our ores. Mr. Bell had made the fire-brick, but they were of peculiar shape and were broken to pieces coming up. So he brought up some clay and burned them here, and they are being laid up at the smelting works.—*Colorado Mining Journal*.

THE Register gives a story of a late coach on the Smoky Hill being surrounded by 40 Indians who beat the passengers over the head with their spears. They were finally scared away by having several breech-loading rifles pointed at them. The passengers who would merely point rifles at Indians under such circumstances deserve to be beaten over the head with spears. The Indians will always be insolent while the Whites are cowardly. A coach full of breech-loading and repeating rifles might prudently attack 40 Indians anywhere and at any time.—*Col. Mining Journal*.

THE Denver folks are going to have a steam fire engine, it is now en route.

THE Colorado House has reduced the price of board to \$9, the first time it has been down so low here since the end of 1863. We are waiting to see the rest of our hotels follow this wholesome example.—*Colo. Mining Journal*.

COR. Basford ex-Governor of W. Field, is a candidate for delegate to Congress from Arizona.

EXTRA PAY FOR ADVENTURE.—The following was the amount, five dollars, to which officers from the rank of Colonel down to Second Lieutenant are entitled, under the Act of Congress approved July 19, 1866, appropriating three months' pay to those who served till the close of the war.

Local and Miscellaneous.

TO ADVERTISERS.—The VEDETTE is the pioneer daily newspaper of Utah. Its immense circulation is in every mining camp and city of Montana and Idaho, to which it gives the telegraphic despatch a whole week ahead of the Pacific papers, makes it the most advantageous medium for advertising in these four central Territories.

WANTED.—A girl to do general house-work. Apply to Mrs. Gen. P. E. Connor.

CELESTIAL WIT.—A Chinaman bargaining for a hog yesterday, after looking at him for some time and noticing how thin and lean he was, turned away exclaiming, "No likee, no likee; too much to eat rock."

JOHN KELLY, the distinguished violinist, arrived in this city yesterday.

ATTENTION is directed to the notice of G. S. Clair.

JAMES H. WHITELAW, a prominent merchant and steamboat man of St. Louis, died in that city on the 5th.

GEO. B. WADDEON, late of this city, is the leading attorney at McVicker's in Chicago.

THE NARADA PAPERS are expecting Gov. Weller to visit that State shortly. We are assured by the Governor that he does not intend to leave Salt Lake before next spring.

THE WOUNDED.—The wounded by the recent explosion at Petaluma are again in a fair way of recovering. Yeomen, Barton and Rickett, for whose lives there were but faint hopes entertained, are now all considered to be improving and likely to be spared to their friends though of course more or less crippled and maimed.

INDEPENDENCE HALL.—The party at Independence Hall last Tuesday evening was one of the most pleasant gatherings that we have ever attended in the city. Upward of thirty-five couples, including His Excellency, Acting Governor Reed; Ex-Governor Weller of California, and a number of other distinguished gentlemen participated in the festivities of the occasion, until among the "small hours" when all went home delighted with the evening's entertainment.

SAN FRANCISCO ADV'TS.—We are in receipt of a large lot of new advertisements and cards from several of the foremost houses at the Bay, all of which will appear at the earliest practicable day, so soon as we shall have arranged our columns and the size of the paper to give them a conspicuous show, that will be satisfactory to themselves and us. We wish to favor our friends at Frisco in getting up their advertisements in "good shape;" so they will please bear patient for a little while, until we illuminate their names in printer's ink as advantageously to their business interests as possible.

HOME AGAIN.—Our Mr. Goldrick has returned from a business tour through Nevada and California, buoyant with the big successes he has struck, in the way of VEDETTE advertisements and subscriptions, to the tune of a couple of thousands. These advertisements, chiefly of leading merchants and manufacturers of San Francisco, shall appear at the earliest day, doing, as we trust, material benefit to the business interests of those firms. Now that the VEDETTE commands the daily attention of the miners, merchants, and the masses from Montana and Arizona and the Colorado, its advertising importance is becoming a power for the Pacific coast.

TELEGRAM.—James Gamble, Esq., Superintendent of the now consolidated "United States Pacific Telegraph Line," between here and San Francisco, arrived in town by Tuesday's coach, on an inspecting tour over the new line just completed between the Bay City and this city of the Saints. The line is now in admirable shape and has commenced working "like a charm." Mr. Gamble is accompanied by Mr. Coleman, who has had charge of a part of the construction between here and Nevada. The new line measures nearly nine hundred miles of wire, between here and San Francisco. It will be completed from here to Omaha, in a few weeks more, and henceforth we shall see "open communication" day and night, between the coasts, and no more need of chronicling that stereotyped sentence of yore—"the line is down."

California Items.

I. WOOD EATON, a California pioneer and well-known merchant of San Francisco, died at his residence in that city on the 12th inst....A saw of sufficient length has been found, to cut the proposed section of the big tree intended for the Fair exhibition....The races on the 11th at the fair in Sacramento came off well; attendance good. The running race of two-mile heats was won by "Pilot" in two straight heats. Time: 3:48-3:51. "Richmond" was withdrawn after the first heat. The running race for three-year-olds was won by "Deringer." Time: 1:48-1:50. "Ellen Moore" beat "Nettie Moore" in the mule dash for two year-olds. Time: 2:01. Both horses carried over weight.

How to Cook. Women.—Many good husbands are spoiled in cooking; some women keep them in hot water constantly, while others freeze them by congeal coolness; some smother them in hatred, contention and variance, and some keep them in a pickle all their lives. These women always serve them up with tongue lances. Now, it cannot be supposed that husbands will be tender and good if managed in this way; but, on the contrary, very delicious when managed as follows: Get a large jar, called the jar of faithfulness, (all good wives keep one on hand) put your husband in it, and set him near the fire of congenial love; let the fire be pretty hot, but especially let it be clear, and above all the rest be constant; cover him with affection, kindness and subjection, garnished with modest, becoming familiarity, and spiced with pleasantness, and if you add kisses and other confectionerries, let them be accompanied with a sufficient portion of secrecy, mixed with prudence and moderation. We would advise all good wives to try this recipe, and realize what an admirable dish a husband makes when properly cooked.—EZ.

AN OFFICER of very small stature but very hasty temper, was one day vehemently scolding at the first soldier of his company, a man of uncommon size. The soldier for some time endured patiently and even unconcernedly the storm of vituperation rising up to him from his diminutive chief. Finding, however, that instead of abating the rage of his officer, it went on increasing, he quietly said to his next man, "John, go and fetch me a stool; I believe he wants to give me a box on the ear."

PETER D. HENDY, formerly agent for Wells, Fargo & Co. at Gold Hill, discharged two months since on account of his accounts not being satisfactory, was arrested at the Sacramento boat as he was starting for Marysville, where his family are, on charge of embezzlement \$30,000. All the money is supposed to have been wasted in stock gambling.

THE TRIAL of 30 ladies for compelling a Czech lady of Indiana to carry the American flag in a procession, is now going on in the District Court of Warren county, Iowa.
